Last Week

Last week our guest speaker was Peter Dell. Peter is the Principal of Dream Cricket Victoria.

Dream Cricket engages its participants through modified and adaptive cricket-themed activities. It has grown to encompass schools and children throughout Australia and internationally, with special focus on Schools for Specific Purposes or disadvantaged schools.

Peter gave us a hands-on display of the tools used in the program, and shared some amusing antidotes of the sessions so far, including the student who managed to break a school window while facing away from the school.

Science and Engineering Challenge 2024

On Monday, I got to see the fruition of a project I've been working on for some time. The Science and Engineering Challenge was relaunched at LaTrobe University after a 10-year absence. I served as the coordinator for the event where I was ably supported by the Rotary Club of Pascoe Vale.

Having had a long association with this project, I am always amazed by the high level of engagement from the students as they performed the various activities. The event had university staff and students volunteering along with Rotarians.

I was especially thankful that Luke DeBuhr came to photograph the event.

A special thanks to Yvonne, who supported me all those days prior to the event as well as helping to volunteer on the day.
